EDUCATION

Institute of Space Technology, Islamabad | Bachelor of Science in Computer Science | Sep 2023 – Sep 2027

Relevant Coursework: Object-Oriented Programming, Data Structures, Artificial Intelligence, Machine Learning, Mobile Application Development, Database Systems

Experience

Internee- MR Consultants, Multan, Pakistan (07/2021 – 08/2021)

- Assisted with office operations, project documentation, and team coordination while enhancing communication and teamwork skills.

Internee- SysReforms International, Islamabad, Pakistan (07/2026– 09/2026)

- Developed cross-platform mobile application features using Flutter and Dart with responsive and user-friendly interfaces.
- Integrated Laravel backend APIs with Flutter and developed RESTful APIs for application data and functionality.

PROJECTS

Fruit Classification using AI/ML

- Built an image classification model for automatic fruit recognition.
- Applied computer vision and machine learning techniques to improve accuracy.

Diabetes Prediction(AI/ML,HTML/CSS,React)

- Developed an AI/ML-based diabetes prediction system that improved the accuracy of an existing dataset by applying advanced machine learning algorithms such as XGBoost and LightGBM.

Fraud Detection Website (AI/ML,HTML/CSS,React)

- Developed an AI/ML-based fraud detection website that improved the recall and accuracy of an existing transaction dataset using machine learning algorithms such as XGBoost and Support Vector Machine (SVM).

Campus Navigation System (C++ & Python)

- Built a campus navigation system using graph data structures and adjacency lists.
- Implemented shortest path algorithms to display optimal routes between locations.

Screen Time Tracker (Kotlin)

- Developed an Android app using Kotlin and Firebase to monitor daily screen time.
- Integrated real-time data storage and usage analytics with a user-friendly interface.

Face Mood Detector (Kotlin & Google Vision API)

- Created an Android app that detects facial emotions using Google Vision API.
- Provided personalized recommendations based on detected mood.

Student Dashboard (React, HTML, CSS, Java)

- Developed a student tracking dashboard to monitor academic and personal activities.
- Implemented responsive UI and multi-user data management using full-stack technologies.

TECHNICAL SKILLS

Technologies: HTML, CSS, Bootstrap, C++, Python, Kotlin, Data Structures, Machine Learning Basics
APIs & Databases: Google Vision API, Firebase, Laravel

CERTIFICATIONS

- Python Certification – GeeksforGeeks
- Programming Fundamentals in Kotlin – Coursera
